

## The Economic Contribution of Iowa Credit Unions

According to an Iowa State University economic report, **Iowa credit unions contributed \$1.25 billion in total economic output in Iowa in 2016. For every \$1 spent by the state's credit unions, there is \$0.70 added elsewhere in Iowa's economy. In addition, every job at an Iowa credit union supports 1.1 other jobs elsewhere in Iowa's economy.**

<sup>2</sup>An input-output model of the state of Iowa, as modified for this analysis, was used to calculate the multiplied-through economic worth of the state's credit unions.
