

The Economic Contribution of Iowa Credit Unions

According to a new economic impact report, **Iowa credit unions contributed \$1.57 billion in total economic output in Iowa in 2018. For every \$1 spent by the state's credit unions, there is \$0.52 added elsewhere in Iowa's economy. In addition, every job at an Iowa credit union supports 1.02 other jobs elsewhere in Iowa's economy.**

²An input-output model of the state of Iowa, as modified for this analysis, was used to calculate the multiplied-through economic worth of the state's credit unions.
